

DeGrave

DeGrave.io is creating a chain-based NFT graveyard featuring a well-designed comprehensive online memorial system.

The multi-chain memorial platform is fulfilled by incorporating Binance Smart Chain and other compatible blockchains. Initially, DeGrave.io has been carefully designed and engineered to create NFT Graves based on the Binance Smart Chain blockchain for memorizing and preserving memory collections from social media.

Mission and Vision

Realizing the full potential of the Blockchain – universal access to memorialize and remember, full participation in NFT Grave – to drive a new era of connection with loved ones.

(We have built our vision of the DeGrave.io ecosystem aligned with the agnostic approach of the industry leaders within the blockchain ecosystem. Incorporating the fundamentals of the decentralized technology with providing interoperability, fast execution and layer 2 solutions within its development roadmaps.)

Solutions

DeGrave.io
online memorial platform -> commemorate
loved ones anytime and anywhere

Deathcoin

Pain Points

Time and Distance Constraints -> COVID 19
Commemoration is found difficult due to time and distance constraints, especially in epidemic times (COVID-19)

Difficult to support the bereaved
Bereaved hardly get through tough times without financial and emotional support.

Lack of collaboration of social media after death
Social media accounts are deleted after death and all remembrance are gone

Token Distribution

Token utility

Token Holders

- Governance on DeGrave.io by protocols decisions involvement
- Staking Rewards: Stake Deathcoin to get rewards

NFT Grave Owners

- Receive Deathcoin reward daily when NFT Grave is on the listings
- Receive donations with discounted commission fee

NFT Visitors / Ancestors

Worshippers

- Purchase digital offerings and NFT memory collections with discount
- Receive donations with discounted commission fee

Earning \$DTC when creating NFT graves

Roadmap

2021 Q2
- Idea Conception
- Design Tokenomics
- Design Go-To-Market Strategy

2021 Q3
- Proving Concept Viability
- Partners Outreach
- Team Building
- Pitch Deck Completion
- Website Completion

2021 Q4
- Public Launch
- Seed Round Sale
- Smart Contract Deployment
- Marketing Campaign
- NFT Grave Listing Rewards

2022 Q1
- Private + Public Token Sale
- BSC Integration
- Token Launch
- Team Expansion

Future Plans

- R&D of IOS and Android Application
- Multi cryptocurrencies payment method
- Additional \$DTC Use Cases
